

DigiVision2

The easy software for fast and accurate take off from Blueprints, maps etc. Specially developed for take off done In combination with the DigiViser

DigiVision2 calculates quantities real-time, based on the input by the DigiViser or equal products. Take off result are shown real-time and the measured objects are re-drawn.

It offers an integrated dimensionsheet and the option to send the data to another Windows application.

Using the menucard minimize the use of mouse and Keyboard, which will increases the speed of your take off.

Combine software DigiVision2 with the DigiViser D-serie for a high speed accurate measuringsystem.
